FLOCEA

RIGID INFLATABLE POOLS

A pool that is easy to install, with genuine structural stability.

High-pressure Drop-Stitch technology combines structured walls, generous bathing space and practical equipment, so you can enjoy your outdoor area sooner.

Planning a pool project?

Project review and guidance before ordering

A PRACTICAL ALTERNATIVE

The reassuring feel of a stable pool, without major construction work.

Flocea pools use Drop-Stitch construction: thousands of internal threads hold the walls in shape once the pool reaches its operating pressure.

- High-pressure walls
  A firmer structure without a surrounding metal frame.
- Simplified installation
  Set up on a clean, level and properly stabilised base.
- Family-friendly formats
  Practical sizes for regular family use.

What you need to plan for

01

An above-ground installation

The pool is designed to remain accessible on its supporting base. It must not be buried or partially buried without a specific technical review.

02

A prepared base

Concrete slab, suitable terrace or stabilised ground: the base must be even, clean and capable of supporting the full water load.

03

Clear access around the pool

Allow access to the connections, filtration system and safety equipment around the pool.

A RANGE DESIGNED TO ADAPT

Three approaches for your outdoor space.

Choose a standard format for straightforward ordering, or a bespoke configuration when your project requires specific dimensions, equipment or operating conditions.

STANDARD FORMAT

Rectangular

3 x 2 m, 4 x 3 m or 7 x 4 m

Create a generous swimming area, make efficient use of a terrace or provide a practical family pool.

STANDARD FORMAT

Round

3 m, 4 m or 5 m diameter

A welcoming shape that sits naturally in a garden and is ideal for shared family time.

BESPOKE PROJECT

Bespoke

Dimensions and equipment to be agreed

For professional projects, constrained spaces or any configuration requiring a tailored design.

Need help choosing the right format?
Flocea can review the proposed location, water access, filtration requirements and useful equipment before you order.

CONFIGURE YOUR POOL

Equipment designed to make everyday use easier.

The standard package includes an electric inflator, a manual pressure-control pump, a fitted Oxford cover, a storage bag and a repair kit. The options below complete the installation according to your needs.

Sand filtration system

Sized to circulate and clarify the water according to the volume of the pool.

Salt chlorination

Water treatment by electrolysis, with the unit selected to suit the pool volume.

Inflatable insulated cover

A bespoke semi-rigid insulating cover, distinct from the Oxford cover included as standard.

Stainless-steel ladder

Three steps and a wide upper platform for safer, more convenient access.

Clear choices from the outset.
All optional equipment is presented separately, allowing you to configure a pool that suits both your intended use and your budget.

A QUESTION OR A PROJECT

Let us discuss your future pool.

Whether you choose a standard format or a bespoke design, our team will help you define the points that matter before ordering.

Four points to confirm

- Pool format and proposed location
- Preparation of the supporting base
- Filtration and water treatment
- Comfort and access equipment

Support from Flocea

Our team helps you confirm the format, installation area, equipment and preparation of your order.
